EDUCATION

Institut Teknologi Nasional **Malang, Indonesia**

Bachelor Degree, Informatics Engineering (GPA : 3.57) *Graduation Date: Feb 2020*

WORK EXPERIENCE

Bramara **Malang, Indonesia**

Co-Founder & Full-stack Developer | Self-employee *Jun 2022 - Present*

- Developed and launched a comprehensive kit for frontend feature development, resulting a increase in efficiency among the development team.
- Collaborated with cross-functional teams to gather requirements and specifications for on-demand feature development, resulting a decrease in time-to-market.
- Implemented the end-to-end development process — from requirements analysis, system architecture design, frontend and backend development, and API integration, to deployment and ongoing maintenance.

PT Medeva Multi Talenta **Malang, Indonesia**

Full-stack Engineer | Contract *Nov 2025 - Mar 2026*

- Developed and maintained Electronic Medical Record (EMR) systems, including technical logging, queue counter, and BPJS-related integration features.
- Conducted User Acceptance Testing (UAT) with BPJS Kesehatan branch offices to ensure smooth bridging with PCare, ICare, and Antrol services.
- Handled system maintenance, deployments, troubleshooting, and collaborated with stakeholders to support continuous feature improvements.

BPJS Ketenagakerjaan (via PT Adi Data Informatika) **Jakarta, Indonesia**

Full-stack Developer | Contract *Nov 2023 - Sep 2025*

- Executed advanced debugging and troubleshooting techniques on the Smile E-Procurement application, resulting in a decrease in system downtime and increasing user satisfaction.
- Collaborated with cross-functional teams in bi-weekly development meetings to discuss new features and enhancements for the application, leading to increase in overall efficiency and productivity.
- Implemented strategic software updates and patches to improve the performance of the E-Procurement and Vendor Management System application, ensuring optimal functionality for users.

PT. Sekawan Media Informatika **Malang, Indonesia**

Full-stack Developer | Full-time *Jan 2022 - May 2023*

- Developed highly functional and user-friendly applications by utilizing cutting-edge programming languages, resulting increase in client satisfaction rate.
- Collaborated closely with clients to analyze their requirements and recommended appropriate solutions, leading to successful delivery of projects on-time and within budget.
- Identified and resolved complex technical issues within existing programs, resulting in a reduction of system downtime.

PT. Maestro Manajemen Nusantara **Malang, Indonesia**

Full-stack Developer | Full-time *Oct 2019 - Dec 2021*

- Developing web applications, designing, developing, and maintaining web applications. This includes both front-end and back-end development.
- Writing clean and efficient code, and well-documented code. They also need to be proficient in debugging and testing their code.
- Creating and maintaining databases, including designing database schemas and writing SQL queries.

LEADERSHIP EXPERIENCE

PT. Sekawan Media Informatika **Malang, Indonesia**

Lead Engineer *Sep 2022 - May 2023*

- Planned and managed project timelines, engineering resources, and delivery schedules to ensure milestones were met on time and within scope.
- Collaborated cross-functionally to prioritize features and translate business needs into clear, actionable product requirements.
- Designed and maintained a comprehensive product roadmap, clearly articulating the product vision, strategic goals, and feature delivery timelines to align stakeholders.
